

**SABIC**  
**1 Lexan Lane**  
**Mount Vernon, Indiana 47620**

**SABIC's Innovative Plastics business** is a leading, global supplier of engineering thermoplastics with an 80-year history of breakthrough solutions that solve its customers' most pressing challenges. Today, Innovative Plastics is a multi-billion-dollar company with operations in more than 35 countries and approximately 9,000 employees worldwide. The company continues to lead the plastics industry with customer collaboration and continued investments in new polymer technologies, global application development, process technologies, and environmentally responsible solutions that serve diverse markets such as automotive, electronics, building & construction, transportation, and health-care. The company's extensive product portfolio includes thermoplastic resins, coatings, specialty compounds, film, and sheet.

The Mount Vernon, Indiana Innovative Plastics location employs approximately 1,200 employees. It was built in 1960 on 150 acres to produce one product, LEXAN™ Resin. Today, the site encompasses 1,100 acres and has expanded its chemical and manufacturing operations to produce multiple products for the company. It is one of the largest sites within the Innovative Plastics business with chemical and product manufacturing capabilities located at one site. The Mount Vernon site strives to be a Responsible Care® company, which means doing the right thing to provide a safe place to work, protecting the environment, and being a responsible neighbor in the community. We comply with all government requirements, are ISO 14001 certified, and our employees spend hundreds of hours each year volunteering in the community.

Innovative Plastics ([www.sabic-ip.com](http://www.sabic-ip.com)) is a wholly owned subsidiary of Saudi Basic Industries Corporation (SABIC).
